User Interface > Output Bar

The Output Bar allows the user to display and track information as well as troubleshoot problems as they happen.

Overview

The Output Bar allows the user to display and track information as well as troubleshoot problems. It functions as a log of events that have taken place during your current SpeedTree Modeler session, such as saving or loading errors.

A screenshot of the "Output" window in SpeedTree Modeler. The window has a dark gray background and a title bar with "Output" and standard window controls. The text inside shows the application's startup sequence, including version information, copyright, and several successful autosave messages. The final line is a warning message in yellow text: "[WARNING] Texture [D:/_Trees/_/Tree_Library/_/Broadleaves/Live_Oak/LiveOakBark_1.tga] failed to load".

```
Output
> SpeedTree® Modeler v6.0.0 (Games Edition)
> Copyright © 2003-2011 IDV, Inc.

>
>
> Ready.
> Autosaving '~LiveOak.sbk' ... success.
> Autosaving '~LiveOak.sbk' ... success.
> Autosaving '~LiveOak.sbk' ... success.
> [WARNING] Texture [D:/_Trees/_/Tree_Library/_/Broadleaves/Live_Oak/LiveOakBark_1.tga] failed to load
```

What Gets Reported In The Output Bar?

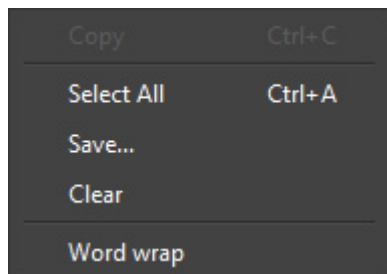

1. *Application processes* - This includes starting up, auto-saves, application states, etc. As processes are initiated and completed, a report is logged.
2. *Warnings* - A warning is reported if an action taken was technically invalid, but perhaps will still

work within the app. Warnings are commonly generated by missing assets (textures, external meshes) or corrupt/old 'SPM' files.

3. *Errors* - An error is reported when an action or process fails. Badly corrupted or invalid 'SPM' files, memory/graphics card issues, and other unrecoverable errors are all examples.

Output Bar Menu Options

The 'Output Bar's' right-click menu contains applicable actions and options.

Copy - Copies the contents of the Output Bar to the Windows® clipboard.

Select All - Selects all of the text in the 'Output Bar'.

Save... - Allows the user to save the output contents as a file in Rich Text Format (RTF).

Clear - Erases the contents of the 'Output Bar'.

Word Wrap - When enabled, any single line of text will wrap around the window.
